

Mesa Panels

TuchScreen PanelPC

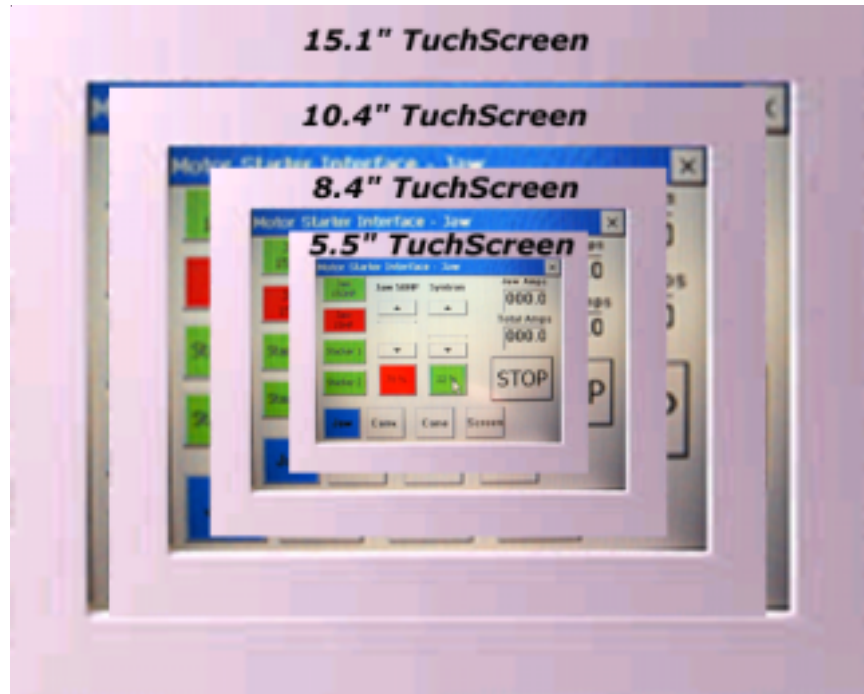

Screen sizes from
5.5" to 15.1"

Basic units are equipped with:

- 24 digital I/O
- 8 analog inputs
- 4 analog outputs.

These can be increased
substantially to control up to:

- 16,000 digital I/O
- 256 analog inputs
- 128 analog outputs.

Features

- Industrial quality TuchScreen
- Ability to control all types of existing and new equipment
 - Soft starts
 - AC and DC variable speed drives
 - Magnetic starters & controls

Data Logging

- Real-time production data logging
- Maintain historical data to allow for better production planning & accurate job-costing

Remote Monitoring

- Real-time remote production monitoring via wireless link using PocketPC technology

Predictive Maintenance

- assists in optimizing maintenance scheduling
- prevents failures at critical production times
- minimizes high cost break down repairs
- allows for real-time scheduled maintenance on all rotating equipment.
