

Mesa Panels

Providing Custom Solutions to your high energy cost problems

Solutions

Power Factor Correction

- Eliminates *hidden charges* from utility company
- Creates efficient power usage
- Environmentally friendly as less apparent power is consumed
- One panel corrects bad power factor for an entire plant

KW Demand Reducers

- Reduce monthly KW demand charges through the use of soft starts, variable frequency drives, load sensing automation, load limiting, and non-critical switching
- These devices can function as stand alone units, or can be controlled with the rest of your plant through our Touch Screen operated automation system
- Wireless control and monitoring available
- Network compatible w/ Windows OS

*All of our products are UL listed

Quary
Mining
Ready Mix
